Hey guys, i made this for all of you steam cs 1.6 players. \*non steam\* Aug 15, 2013 lion CFG 2013 config is an Counter-Strike 1.6 config download.. Aim cfg. Summary. lion CFG 2013 config is a cs config game file download. Q: Magento-1.9 search I have been searching and searching but can't seem to find an answer. I'm using Magento-1.9. I have some articles (of varying levels) that I have categorized in the CMS with a parent-child relationship (1 to many). I want to display these in a search form, however my problem is that I can't figure out what exactly to search for in the database. I have a row in the database called article that has attributes article\_id, title, content and is\_active. The title, content and is\_active are always going to be filled in but the article\_id and article\_parents are unknown until they are generated. I'm not sure how I would go about running a search query for a parent ID and display child rows only I'm sorry if my question isn't clear, basically I'm after a way to search Magento for articles that have a related ID and then return the ID's of the children. The result would be a list of child articles of that parent. Many thanks A: If I understand correctly, you want to retrieve a list of articles for a parent, where you do not have access to the article\_id or article\_parent values. To do this, you need to write a custom database query: `SELECT article.* FROM `catalog_category_product` AS article JOIN `catalog_category_product` AS article_parent ON article_parent.product_id = article.product_id AND article_parent.category_id = article.category_id WHERE article.product_id = 'X'` Eurozone 'talks down risk of break-up' European Union statistics service Eurostat has published a new report showing that the eurozone debt crisis has pushed Ireland, Greece and Portugal into recession.

AIM/NO RECOIL - G3 PERFORMANCE CFG FILE | 2.1× | 1M | 450. 0KB. Download Aim cfg for One of the best config ever in CS. You're welcome to download cs 1.6, aim, aim.cfg for this version of CS.
